

## The United Arab Emirates' Maritime Preload Cargo Information (MPCI) program

The MPCI program is led by the United Arab Emirates' National Advance Information Center (NAIC). The program is a government initiative designed to enhance cargo security. The NAIC is a federal entity that manages the collecting of cargo and passenger information for risk evaluation and security screening.

The program requires electronic submission of containerized cargo details at least 24 hours prior to vessel departure or loading of cargo from last foreign departure port outside the UAE.

### When will it be implemented?

Effective July 31, 2025, the MPCI program requires advance submission of containerized cargo information to enable early risk assessment and compliance checks for shipments bound for UAE ports.

### Who is responsible?

- Shipping Lines are responsible for filing the carrier's Bill of Lading.
- Freight Forwarders or Non-Vessel Operating Common Carriers (NVOCCs) are responsible for filing the freight forwarder's Bill of Lading.

### How can I get fast and accurate assistance?

Trade Tech is actively preparing for this important regulatory change and is committed to helping our customers achieve compliance.

By leveraging our expertise in advance cargo security filings, we offer a streamlined and efficient process for all stakeholders in the supply chain.

# UAE's MPCl Security Filing Program

## Key Requirements of the UAE's MPCl Program

- Bill of Lading details must be submitted at least 24 hours prior to vessel departure from last foreign departure port outside the UAE.
- Master Vessel Operators, Freight Forwarders, Master Loaders, and Co-Loaders are all required to file Bill of Lading details.
- Forwarders must clearly identify the actual shipper and consignee in their filings.
- Vessel Operators must verify that forwarders' filing was approved prior to cargo loading.
- Vessel Operators must update Bill of Lading details with the actual vessel name and departure date.
- Shipping lines must file the carrier's Bill of Lading, while freight forwarders or NVOCCs must file the House Bill of Lading.
- Freight forwarders may delegate filing to overseas partners, and shipping lines may delegate to agents, but liability remains with the original filing party.
- Filings are required for import, transshipment, transit, and Freight Remaining on Board (FROB) cargo.

## NAIC will issue response statuses upon filing:

- ACT (Accepted)
- DNL (Do Not Load)
- RFI (Request for Information)

**Trade Tech currently supports cargo security filings** in more than 35 countries, including the United States, Canada, Mexico, Japan, South Africa, the United Kingdom, and across the EU. As governments adopt standardized pre-departure filing requirements, Trade Tech's platform enables seamless data exchange across jurisdictions, reinforcing its role as a critical enabler of global supply chain compliance.
